Forward-looking Statements

Certain statements in this presentation contain forward-looking statements, within the meaning of the Private Securities Litigation Reform Act of 1995, regarding the company's future plans, objectives, beliefs, expectations, representations and projections. The company has tried, wherever possible, to identify these forward-looking statements using words such as "intend," "anticipate," "believe," "plan," "encourage," "expect," "may," "goal," "become," "pursue," "estimate," "strategy," "will," "projection," "forecast," "continue," "accelerate," "promise," "increase," "higher," "lower," "reduce," "improve," "expand," "progress," "potential" or the negative of those terms or other variations of them or by comparable terminology. The absence of such terms, however, does not mean that the statement is not forward-looking. It is important to note that forward-looking statements are not guarantees of future performance, and the company's actual results could differ materially from those set forth in

any forward-looking statements. Factors that could cause actual results to differ from forward-looking statements include but are not limited to: the company's ongoing antitrust litigation; the company's dependence on its relationships with several large national providers; continued fluctuations in mortality rates and increased cremations;

ongoing involvement in claims, lawsuits and governmental proceedings related to operations; failure of the company's announced strategic initiatives to achieve expected growth, efficiencies or cost reductions; disruptions in the company's business or other adverse consequences resulting from the separation of Hillenbrand Industries into two operating companies; failure of the company to execute its acquisition and business alliance strategy through the consummation and successful integration of acquisitions (such as the acquisition of K-Tron International, Inc.) or entry into joint ventures or other business alliances; competition from nontraditional sources in the funeral services business; volatility of the company's investment portfolio; increased costs or unavailability of raw materials; labor disruptions; the ability to retain executive officers and other key personnel; and certain tax-related matters. For a more in-depth discussion of these and other factors that could cause actual results to differ from those contained in forward-looking statements, see the discussions under the heading "Risk Factors" in Item 1 of the company's Annual Report on Form 10-K for the year ended September 30, 2009, filed November 24, 2009. The company assumes no obligation to update or revise any forward-looking information.

HILLENBRAND, INC.

Transaction Summary

Transaction Summary

Overview	Hillenbrand, Inc. to acquire K-Tron International, Inc. (Nasdaq: KTII) for 100% cash consideration
Purchase Price	The net purchase price associated with this transaction is approximately \$390 million based on equity purchase price of \$435 million and a net cash balance at
Ownership	10/3/09 of approximately \$45 million. This net purchase price implies a multiple of 10.3x EBITDA Upon completion of the transaction, Hillenbrand stockholders would own 100% of the combined company
Closing Conditions	The transaction is subject to approval by K-Tron International shareholders, as well as the satisfaction of customary closing conditions and regulatory approvals
Timing	The transaction is expected to close near the end of March

Transaction Rationale

- Hillenbrand's sole operating unit, Batesville Casket, remains a high-margin cash generator with a leading brand and excellent management
- However, revenue growth is historically challenging in death care and has been even more challenging in the current economic environment
- Therefore, our strategy focuses on effective high value opportunities for our robust cash flow, creating a strong and enduring enterprise outside death care
- Through disciplined due diligence, we identified K-Tron International, a well-run company with excellent financials, that will provide growth and diversification and maintain our strong financial profile
- To fund this acquisition, we will utilize a combination of existing and potentially new (if needed) credit and cash-on-hand

HILLENBRAND, INC.

- Strong and consistent EBITDA margins during current severe economic downturn
- Recurring high-margin consumable part sales create strong base through economic cycles
- Margin strength is a sign of superior management and a strong product/brand position

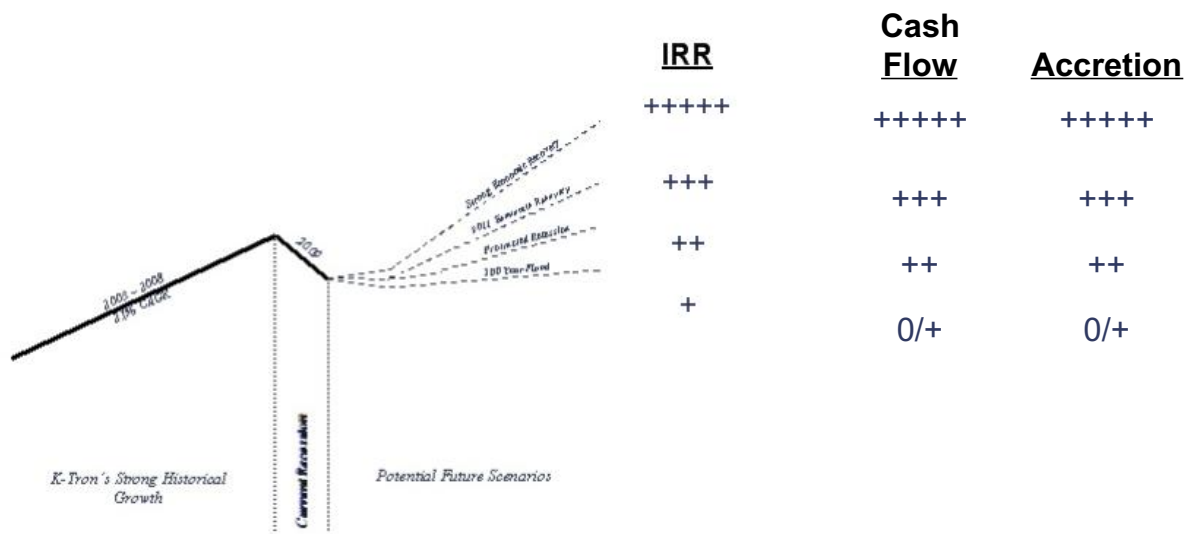

⁽¹⁾ Excludes a \$3.0 MM gain in 2009 on sale of 19.9% investment in Hasler International. Including the gain, K-Tron's LTM EPS would have been \$7.81 and the EBITDA would have been \$42MM.

Hillenbrand, Inc.

K-Tron International Is Strongly Positioned to Weather the Current Economic Downturn and Thrive Post Recession

- K-Tron revenues declined in the first nine months of 2009 by \$30.2 MM, or 17%, compared to the same period in 2008
- A significant component of the revenue decline was K-Tron's Process Group plastics business, which was impacted when automotive and other end customers were hurt by the "great recession"
- However, revenues in the Size Reduction Group increased during the year, buffering the decline in plastics
- We believe the strength of K-Tron's brands was, and will continue to be, critical to its ability to outperform their markets in economic downturns
- K-Tron has a large installed base that generates recurring replacement parts business, thereby softening the impact of economic downturns in the capital equipment business
- As the economy strengthens, K-Tron is in a strong position to grow revenues in both base businesses and potential add-on business lines

Death Care Industry Is Stable, but Challenges Remain

Reduced Burial Demand

- Slow and steady increases in cremations have reduced burials in a flat death market
- While projected deaths will increase at some point as baby boomers age, this will likely be offset by continued increases in cremations
- Cremations are projected to grow steadily at 1.2% annually as a percentage of total deaths

Reduced Consumer Spending

- Cost conscious consumers have been mixing down, opting for less expensive caskets
- It remains to be seen whether the severe economic downturn will cause lasting pricing repercussions

Increased Competition

- Market share may be under pressure, as new entrants and Chinese imports continue to compete

Commodity Risk

- Significant increases in the prices of raw materials that cannot be recovered through increases in the price of our products could adversely affect our results of operations and cash flows

By Investing Prudently in Batesville Casket, We Will Continue to Focus on Future Revenue and Earnings Growth From This Segment and Generate Strong Cash Flow

Top-line Growth

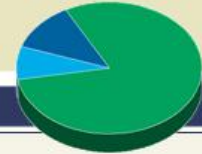

- Focused sales coverage that leverages strong customer relationships and premium brand
